Behavior graph

Specs description

	Program did not start		Low-level access to the HDD		Process was added to the startup		Debug information is available
	Probably Tor was used		Behavior similar to spam		Task has injected processes		Executable file was dropped
	Known threat		RAM overrun		Network attacks were detected		Integrity level elevation
	Connects to the network		CPU overrun		Process starts the services		System was rebooted
	Task contains several apps running		Application downloaded the executable file		Actions similar to stealing personal data		Task has apps ended with an error
	File is detected by antivirus software		Inspected object has suspicious PE structure		Behavior similar to exploiting the vulnerability		Task contains an error or was rebooted
	The process has the malware config
